

Security Complete

Security is one of the most critical problems facing anyone who is charged with administering and maintaining an enterprises computer network. This text aims to help anyone involved with maintaining a network to better secure it and prevent disasters from occurring and systems from crashing and destroying vital corporate data. It covers: strategies for preventing networks from attack; Internet and external security; tunnelling through VPNs (Virtual Private Networks); choosing and configuring firewalls; and dealing with bugs, viruses and Trojan Horses.
