

Cisco Networking Academy Program: First- and Second-Year Interactive Guide

The only official CCNA networking simulation training software from Cisco Systems for CNAP students. Networking simulation teaches real-world understanding of essential networking concepts for enhanced learning. Utilizes the same software in Cisco Systems Web-delivered curriculum, allowing for a familiar learning environment. Multiple electronic elements provide a variety of learning media on CCNA topics for enhanced knowledge retention. Cisco Networking Academy Program: CCNA Interactive Guide provides the next best thing to a lab full of routers by immersing the user in a networking simulation environment complete with multiple virtual routers. Users are directed through numerous labs that teach and test their abilities to master the configuration and implementation of different CCNA-oriented technologies. The program interface is the same one used in the Web-delivered curriculum of the Cisco Networking Academy Program. With this, students are immediately familiar with the CCNA Interactive Guide interface and begin learning immediately. Other valuable electronic media tools like question sets, instructional videos, eLab activities, and Photozooms enhance the learning experience to maximize both understanding and retention.
