

Getting Started with Linux: Novells Guide to CompTIAs Linux+ (Course 3060)

Getting Started with Linux: Novells Guide to CompTIAs Linux+ (Course 3060) introduces students to the knowledge and skills needed to manage all Linux distributions. Specifically, this course covers the objectives outlined by CompTIA for its Linux+ exam and certification, an international industry credentials that offers proof of knowledge. Not only does this course prepare students for the ComTIA Linux+ exam; it offers an excellent way to begin preparing for the Novell Certification Linux Professional (Novell CLP) practicum exam. In fact, after completing this course, students will have acquired one-third the knowledge needed to become a full Novell CLP, the ideal certification for people interested in becoming Linux administrators.
