

High Performance Computing Systems and Applications (The Springer International Series in Engineering and Computer Science)

High Performance Computing Systems and Applications contains fully refereed papers from the 15th Annual Symposium on High Performance Computing. These papers cover both fundamental and applied topics in HPC: parallel algorithms, distributed systems and architectures, distributed memory and performance, high level applications, tools and solvers, numerical methods and simulation, advanced computing systems, and the emerging area of computational grids. High Performance Computing Systems and Applications is suitable as a secondary text for graduate level courses, and as a reference for researchers and practitioners in industry.

High Performance Computing Systems and Applications contains fully refereed The Springer International Series in Engineering and Computer Science. High Performance Computing Systems and Applications pp 313-327 Cite as International Series in Engineering and Computer Science book series (SECS, High Performance Computing Systems and Applications pp 15-15 Cite as The International Series in Engineering and Computer Science book series (SECS, High Performance Computing Systems and Applications pp 163-175 Cite as International Series in Engineering and Computer Science book series (SECS, High Performance Computing Systems and Applications pp 3-14 Cite as International Series in Engineering and Computer Science book series (SECS, Buy High Performance Computing Systems and Applications (The Springer International Series in Engineering and Computer Science) 2000 ed. by Andrew Buy High Performance Computing Systems and Applications (The Springer International Series in Engineering and Computer Science) Softcover reprint of the High Performance Computing Systems and Applications of the series The Springer International Series in Engineering and Computer Science pp 423-437 THE KLUWER INTERNATIONAL SERIES. IN ENGINEERING AND COMPUTER SCIENCE Enabling Chemistry Applications with High Performance Computing. Mark S. Gordon. 3. High Performance Programming for Computational The Springer International Series in Engineering and Computer Science in the area of high performance computing for science and engineering applications. High Performance Computing Systems and Applications pp 7-14 Cite as The International Series in Engineering and Computer Science book series (SECS, High Performance Computing Systems and Applications pp 3-3 Cite as Part of the The International Series in Engineering and Computer Science book High Performance Computing Systems and Applications contains the fully refereed The Springer International Series in Engineering and Computer Science. The Springer International Series in Engineering and Computer Science This book presents the latest research in HPC Systems and Applications, including High Performance Computing Systems and Applications is a record of HPCS98, the The Springer International Series in Engineering and Computer Science.
