In the early 1960s, Carroll Shelby, a Texas chicken-farmer turned champion-race-driver, had the audacity or vision to think he could start his own auto manufacturing company. As if that wasn't daunting enough, Shelby decided his company would manufacture nothing but ultra-high-performance sports cars, beginning with the landmark Cobra, introduced in 1962. To the amazement of everyone except Shelby himself, Shelby Automobiles succeeded beyond anyone's wildest expectations, building cars that set the world's standards for performance (benchmarks that stand to this day) & winning world championships in the process. Shelby Cobra: Fifty Years provides the complete history of Shelby's Cobra sports cars, from the events that led up to Shelby's decision to build a high-performance sports car, to the history of the production of Cobra street cars & race cars, ending with an epilogue about the continuation cars. Cobras Shelby American continues to build to this day. Carroll had the Hot Rod sense to put an American V8 Ford, into a lightweight British AC Bristol - Now that's a hybrid! A must read for all Shelby owners, racing fan, & car enthusiast. The legend lives on! Author: Colin Comer, an authority on collector cars, documents the Cobra history & tells the story of the colorful people who owned them, drove them & race them in his beautifully documented new book, Shelby Cobra Fifty Years.
